7. Four patrol ships, the bows of only two of which could be seen,

25X1

- 8. Four or five small M.L.-
- 10. Two small M.L. drawn up on the mole .-
- 17. A landing craft .-

## III. LEANS OF NAVIGATION

The followinf means of navigations were sighted in the harbor:

- 9. Small floating dry-docks .-
- 18. Two barges docked at the head of the NEW MOLE .-

A LENIN type life boat, armed with two covered guns on the bow and equipped with a wireless set and a radio direction finder. Sighted on this vessel, was also a wooden box that had been used to cover eventual mechanism on the vessel, possibly a gun.

## IV. COAST DEFENCE

Two covered guns were sighted near the light-house on Cape FONTANA .-

#### V. GENERAL INFORMATION

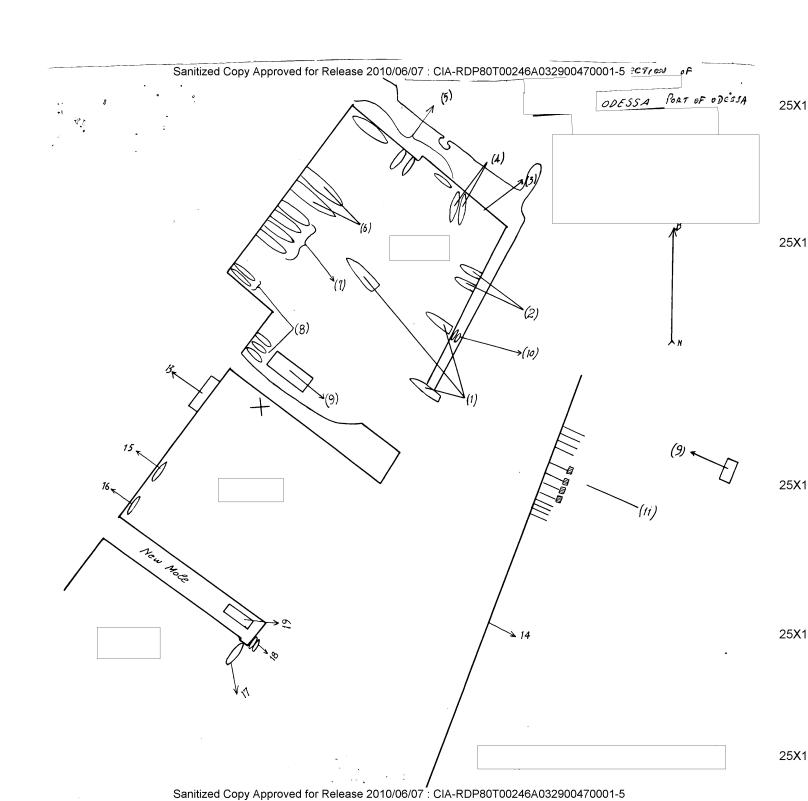

11. Thin poles, approximately 4 meters tall, some of which tore small netted frameworks, were sighted being either on the breakwater or 25X1 on floating targets behind it. Due to the long distance, could not ascertain their use.—

Slackening is recently observed in measures for searching foreign ships.—

| similar to the ships of the GYLS (N/A) (sic), equipped with RADAR that had a  |
|---|
| solid ancenna.  |
| 7. Nine ships like the L/L (A/N) (sic), a little larger and without any Mada  |
|   |
| 3. Five destroyers of MANXX 1,000 - 1,100 tons, rather of the same type,  |
| newly built   |
| (At the end of this report a plan of this type of a destroyer together  |
| with explanatory notes and its general characteristics).  |
| 9. Two submarines, of which the one was large and most probably newly built.  |
| it had two periscopes and a bridge that was of a rather unusual type, which (acuttle).  nad small side light / on its top part and along its entire length. |
| o Snorkel was observed.   |
| 10. Four to five destroyers that looked like the N.T.B.'s (torpedo-boats  |
| out without any torpe lo-tubes), having a machine-gun and Badar, like at  |
| point (6) of the plan (i.e. similar to the halar of 4 HATZIKONSTAUTIS).   |
| 1. A patrol vessel of 100 - 120 tons, older than the previous ones,   |
| It had a quick-firing gum   |
| and Madar like the above-mentioned vessels. The color of all the above  |
| entioned ************************************   |

# III. FIOATI.U TLANS

12. Two barges moored by the stern, specially constructed for the carrying of mud (MLAPL) (sic).

13. Three barges of the usual kind, moored by the storm and equipped with an engine.

# TO PORT OF THE TAX PROPERTY AND COMPANY OF THE

14. Old ship (floating dry-dock) of 500 to 600 tons, evidently being used for providing small ships with dry-dock services. Two or three auxiliary barges (?) were observed being moored alongside on both sides of the above mentioned ship.

15. Old iron-floating dry-dock, of 1,000 to 1,500 tons! capacity. There was observed in it a small old submarine of about 500 tons.

## IV. GERLERAL

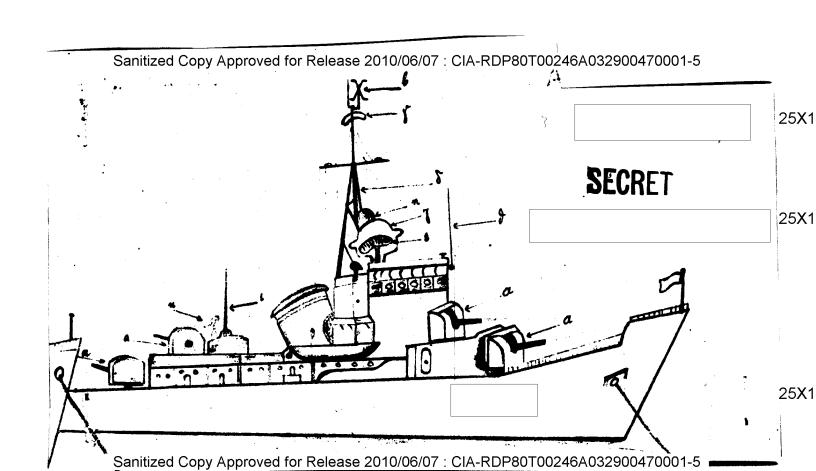

At the position 6: 46° 04' 09" and 1: 30° 49' 05" there is a wrecked ship, the masts of which are about three feet above the surface of the sea.

During the stay of a passenger ship in the port, a tourist of unknown identity was arrested while he was taking photographs of the port.

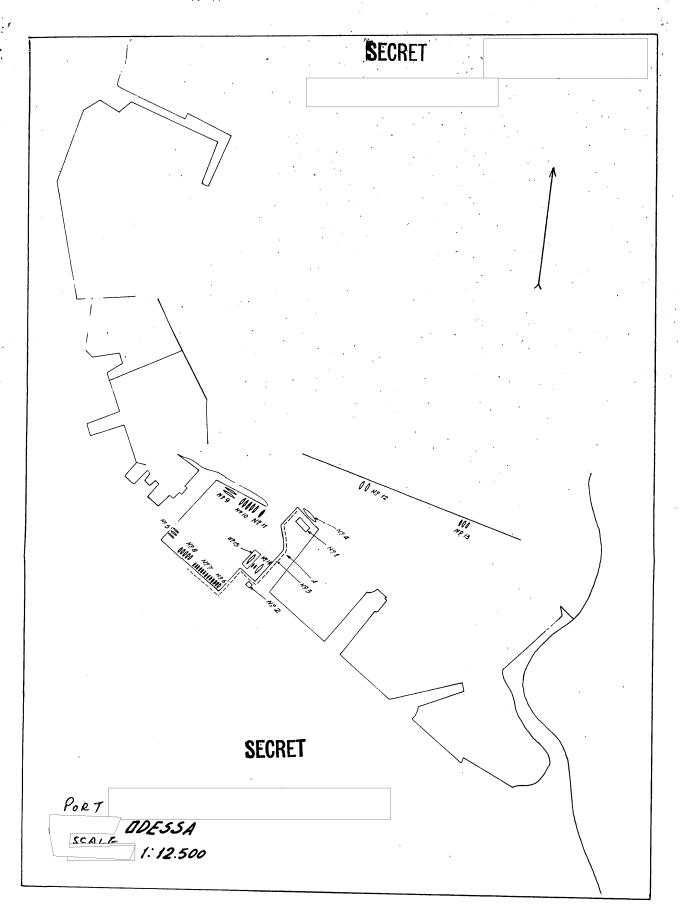

After being detained for 2 hours, he was set free.

- F.- The following were observed in the space reserved in the harbor for the Navy ships to anchor (see drawing).-
- 1. Three patrol ships bearing four guns each two on each side, prow and stern The guns were separated from each other and were placed in little towers.

- 2. Two (2) small patrol coast guard vessels.
- 3. 300-400-ton tanker.
- 4. Two submarines.
- 5. Various auxiliary ships of the Navy.
- 6. Two open-sea cruisers, part of the bridges of which and a covered funnel, were

| seen.                                 |   |     |
|---------------------------------------|---|-----|
| 7. Four (4) patrol vessels, the prows | s of the first two of which were seen,    |     |
| Only the masts o                      | of the rest could be seen.                |     |
| 3. Four or five small M.L.s.          | ·   | 25X |
| 9. Small, floating dry-docks.         |   |     |
|                                       | ما مراء                                   |     |
| 10. Two small M.L.s, drawn up on the  |   |     |

- There is Radar installed on CAPE FONTANA.

There is a monastery built on the rock of the cape, under which there

is the Light-house. The Radar is installed on the expansion of the Light-house's Little building, towards the sea.

- There is a sound buoy at a three-mile distance from the shore of the cape.

| Contract of the contract of th |
| 8. The Russian cargo ship (VOIGA', also proceeding with the unloading of   |
| coal   |
| 9. approx. 6-7.000-ton, DIESEL-engined vessel, proceeding with 25)   |
| the loading of iron materials.   |
| 10. Two, white colored, Russian passenger ships, one of which had one funnel   |
| The other was an old ship with   |
| two funnels,   |
| these ships that they are disarmed in the winter, while, in the summer,  |
| they are used for tourist trips in the Black Sea.  |
| 11. Two Russian cargo ships undergoing repairs.  |
| 12. Two cargo ships of approx. 2.500 tons each, proceeding with the 25%  |
| unloading  |
| 13. The cargo ship proceeding with the loading of coal to be   |
| 14. Approx. 5-6.000-ton vessel of unknown data, coming out of the harbor. Grey-  |
| colored cars were observed on the deck of this ship.   |
| 15. Russian tankers of 22.500-ton capacity, that were loading from barges.   |
| After Loading, the above tankers left the harbor to return in a few hours  |
| time. Calculated speed, 12 miles p.h.  |
| (b) Battle ships.  |
| 1. Six small torpedo boats were observed coming out of the harbor  |
| 25)  |
|  |
| The above torpedo boats had one funnel and two small towers each, one on   |
| each end, and a torpedo tube sternwards of the funnel. 25X1  |
| In addition to the torpedo boats, a target was observed being tugged out   |
| of the harbor. The torpedo boats and the target took a course South.   |

| 4 0. | - 3 - (20 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1                                |
|------|--|
|      | 25X1   |
| 2.   | A battle ship, came out and  |
|      | anchored outside of the harbor The above                                       |
|      | battle ship had three funnels, one of which was very close to the bridge,      |
|      | while the other two were at regular intervals. It had two towers on each       |
|      | of its sides, as well as two towers on each end - stern and prow - the         |
|      | towers being one on top of the other. Its prow was rather steep and very       |
|      | narrow in front.   |
|      | The above battle ship, together with an open sea cruiser and a torpedo         |
|      | boat, did some target practice 6-7 miles north of the harbor. The columns      |
|      | of water from the gun-firing, were visible at the target area.                 |
| 3.   | Two small submarines, were observed entering                                   |
|      | the harbor   |
| 4.   | Six mine sweepers were performing mine sweeping from FONTANA and up to         |
|      | 3-4 miles north of the harbor The mine sweeping 25X                            |
|      | was carried out almost daily by the same mine sweepers.                        |
|      | In addition to the mine sweeping done in the above area, two mine sweepers 25X |
|      | performed mine sweeping in an area (outside the harbor) marked in              |
|      | maps as restricted for anchorage.  |
|      | The mine sweeping took place without interruptions, 24 hours a day.            |
|      | ·  |
|      | VIGABLE MEANS.   |
|      | e following navigable means were observed in the harbor.                       |
| 1.   | Two floating dry-docks, one bearing an approx. 10.000-ton passenger ship,      |
|      | the other bearing a LIBERTY type vessel.                                       |
| 2.   | A large lifeboat.  |

# I. ORGANIZATION

CIL PIER. On this pier there are four separate positions where ships can moor alongside. Each of these positions is, on the side where ships moor, wooden and is supported by wooden poles. After the wooden part of the pier there come flat blocks of cement which are supported by sheet-iron, which again in its turn is supported by poles. Under them there are twelve 12-inch pipes. At each of the above mentioned mooring positions there is a small hand-operated crane used for placing the connections of the pipes. No pipes were visible on the main pier. Maintainance does not seem to be satisfactory. The sluices were of different colors but now these XXX can no longer be distinguished.

From the pumphouse, which is located on the pier, they stop the supplying of the ships with oil after a signal to this effect is given from the ships.

- one destroyer and 3 torpedo-boats carried out outside the port manoeuvers of firing torpedoes.
- 3. During most of the above mentioned period a patrol vessel was carrying out patrols outside the port.
- 4. There was also observed outside the port a minesweeper which was sailing all day long, having covered about 10 times the distance between the port and FCHTAHA. (It has not been made clear whether it was carrying out manoeuvers or whether it was really carrying out mine-sweeping operations).

  Time-sweeping system is the "V".

## III. FLATING ....A.S

- 1. In the small bay formed by the oil pier at the north section of the port there was observed a modern ship dredger which was carrying out dredging operations during the entire 24 hours.
- 2. There were observed three (3) floating dry-docks, two of which were made of cement. There were in these I dussian Liberty ship and two dussian passenger ships of about 20,000 tons each.

## GrinarAL

It is estimated that about 40 ships were loading and unloading, while another 10 were waiting outside the port for their turn to come.

- There were observed large ships (20,000 tons) that were being demagnetized (sic) for six (6) days.
- There were noticed a lot of imports of a) rice, b) sugar and c) coment from

I. ORGANIZATION (See attached plan).-

On the oil pier one observed the following:

- 1. Thirteen (13) \*\*\* oil-receiving-points, with approximately an 8-duch diameter, which give the impression that they are maintained badly.
- 2. Location of the Pumphouse.
- 3. Cil tanks; the two of them, which were also the larger, were painted black, while the rest were painted red.

On the piers there are three local diameter pipes, which end at the positions where the ships are being loaded in two other 8-inch diameter pipes.

KROUBOCEV, Vasili is in charge of oil loading.

- 4. Location of electricity plant. Near the XX plant there is a fenced area full with coal. A railroad track terminates in this area. Another railroad track is passing before the plant.
- 5. Location where a check is made of the crews that leave to go to the town.
- 6. Location of sugar factory.
